ELSEVIER International Journal of Mass Spectrometry and Ion Processes 163 (1997) 243–246

International Journal of Mass Spectrometry and Ion Processes

Subject index

Ab initio
Ab initio calculations on the isomerization of C_4H_4 radical cations 169
Acetonitrile
Calculated and measured double-ionization energies of acetonitrile to singlet and triplet electronic states of the doubly charged ion 121
Adsorption isotropic effects
Adsorption in gas mass spectrometry. I. Effects on the measurement of individual isotopic species 207
Adsorption–desorption
Adsorption in gas mass spectrometry. I. Effects on the measurement of individual isotopic species 207
Agostic effects
Stereoelectronic effects in phosphorous dichloride cation/pyridine complexes 89
Aqueous aerosols
On-line analysis of aqueous aerosols by laser desorption ionization 29
Argon
Electron-impact ionization cross-section of argon ($\sigma_{n+}, n = 7, 8$) 39
Atomic weight
Isotopic abundance measurements of K and Ca using a wide-dispersion multi-collector mass spectrometer and low-fractionation ionisation techniques 1

Branching ratio
Variation in branching ratios for ion pair formation from $CFCl_3$ photoexcited in the inner-shell transition regions 229

Calcium
Isotopic abundance measurements of K and Ca using a wide-dispersion multi-collector mass spectrometer and low-fractionation ionisation techniques 1
Cation affinity
Stereoelectronic effects in phosphorous dichloride cation/pyridine complexes 89
Cesium
Secondary ion mass spectrometry of sodium nitrate: comparison of ReO_4^- and Cs^+ primary ions 185
Cluster
On some peculiarities of the low temperature fast atom bombardment mass spectra of ethanol 163
Coating
SIMS analysis of the near-surface layer of fibres of small diameter 69
Computational chemistry
On the cleavage of the peroxide O–O bond in methyl hydroperoxide and dimethyl peroxide upon protonation 101
C_4H_4 radical cations
Photodissocociation of C_4H_4 radical cations produced by fragmentation of 1,5-hexadiyne. A competition between one- and two-photon dissociation and photon-induced isomerization 81
Ab initio calculations on the isomerization of C_4H_4 radical cations 169

Depth profile
SIMS analysis of the near-surface layer of fibres of small diameter 69
DFT/HF hybrid methods
On the cleavage of the peroxide O–O bond in methyl hydroperoxide and dimethyl peroxide upon protonation 101
Disappearance cross section
Secondary ion mass spectrometry of sodium nitrate: comparison of ReO_4^- and Cs^+ primary ions 185
Dissociation and ionization
High intensity laser mass spectrometry – a review 149
Double-ionization energies
Calculated and measured double-ionization energies of acetonitrile to singlet and triplet electronic states of the doubly charged ion 121

Electron emission
Distinction between multicharged fullerene ions and their fragment ions with equal charge-to-mass 1L
Electron impact ionization
Electron-impact ionization cross-section of argon ($\sigma_{n+}, n = 7, 8$) 39
Electron ionization
Electron-impact ionization of nitric acid 131
Energetics
Selected ion flow tube studies of the reactions of the

isomers $C_2H_5OH_2^+$ and $(CH_3)_2OH^+$ with a series of molecules 221
Energy distributions
Application of the infinite velocity method for investigations on the spatial and time-correlated emission of the constituents forming MCs^+ secondary ions in secondary ion mass spectrometry 197
Ethanol
On some peculiarities of the low temperature fast atom bombardment mass spectra of ethanol 163

FAB
On some peculiarities of the low temperature fast atom bombardment mass spectra of ethanol 163
Femtosecond lasers
High intensity laser mass spectrometry – a review 149
Fibre
SIMS analysis of the near-surface layer of fibres of small diameter 69
Field ionization
High intensity laser mass spectrometry – a review 149
FT-ICR
Theoretical investigation of improved ion trapping in matrix-assisted laser desorption/ionization Fourier transform ion cyclotron resonance mass spectrometry: independence of ion initial velocity 47
Fullerences
Distinction between multicharged fullerene ions and their fragment ions with equal charge-to-mass 1L
Fullerene coalescence
Enhanced coalescence reactions of fullerenes by laser desorption of C_{60} derivatives 19
Fullerene derivative
Enhanced coalescence reactions of fullerenes by laser desorption of C_{60} derivatives 19

Gas mass spectrometry
Adsorption in gas mass spectrometry. I. Effects on the measurement of individual isotopic species 207
Giant fullerene
Enhanced coalescence reactions of fullerenes by laser desorption of C_{60} derivatives 19

Infinite Velocity Method
Application of the infinite velocity method for investigations on the spatial and time-correlated emission of the constituents forming MCs^+ secondary ions in secondary ion mass spectrometry 197
Inner-shell excitation
Variation in branching ratios for ion pair formation from $CFCl_3$ photoexcited in the inner-shell transition regions 229
Ion pair formation
Variation in branching ratios for ion pair formation from $CFCl_3$ photoexcited in the inner-shell transition regions 229
Ion trapping
Theoretical investigation of improved ion trapping in matrix-assisted laser desorption/ionization Fourier transform ion cyclotron resonance mass spectrometry: independence of ion initial velocity 47
Ion/molecule reaction
Selected ion flow tube studies of the reactions of the isomers $C_2H_5OH_2^+$ and $(CH_3)_2OH^+$ with a series of molecules 221
Ions
Calculated and measured double-ionization energies of acetonitrile to singlet and triplet electronic states of the doubly charged ion 121
Isomerization
Ab initio calculations on the isomerization of C_4H_4 radical cations 169
Isotope amount ratios
Adsorption in gas mass spectrometry. I. Effects on the measurement of individual isotopic species 207

Kinetic method
Stereoelectronic effects in phosphorous dichloride cation/pyridine complexes 89

Laser desorption
Enhanced coalescence reactions of fullerenes by laser desorption of C_{60} derivatives 19
Theoretical investigation of improved ion trapping in matrix-assisted laser desorption/ionization Fourier transform ion cyclotron resonance mass spectrometry: independence of ion initial velocity 47
Laser desorption/ionization
On-line analysis of aqueous aerosols by laser desorption ionization 29
Leak rate
Adsorption in gas mass spectrometry. I. Effects on the measurement of individual isotopic species 207
Low temperature
On some peculiarities of the low temperature fast atom bombardment mass spectra of ethanol 163

MALDI
Theoretical investigation of improved ion trapping in matrix-assisted laser desorption/ionization Fourier transform ion cyclotron resonance mass spectrometry: independence of ion initial velocity 47

Mass fractionation
Isotopic abundance measurements of K and Ca using a wide-dispersion multi-collector mass spectrometer and low-fractionation ionisation techniques 1
Mass spectrometry
Distinction between multicharged fullerene ions and their fragment ions with equal charge-to-mass 1L
Isotopic abundance measurements of K and Ca using a wide-dispersion multi-collector mass spectrometer and low-fractionation ionisation techniques 1
Mass-to-charge spectrometry
Electron-impact ionization cross-section of argon ($\sigma_{n+}, n = 7, 8$) 39
Metal cesium secondary ion formation
Application of the infinite velocity method for investigations on the spatial and time-correlated emission of the constituents forming MCs^+ secondary ions in secondary ion mass spectrometry 197
Microparticle analysis
On-line analysis of aqueous aerosols by laser desorption ionization 29
Multiple ionization cross-section
Electron-impact ionization cross-section of argon ($\sigma_{n+}, n = 7, 8$) 39

Nitric acid
Electron-impact ionization of nitric acid 131

On-line analysis
On-line analysis of aqueous aerosols by laser desorption ionization 29

PCl_2^+
Stereoelectronic effects in phosphorous dichloride cation/pyridine complexes 89
Peroxide chemistry
On the cleavage of the peroxide O–O bond in methyl hydroperoxide and dimethyl peroxide upon protonation 101
Perrhenate
Secondary ion mass spectrometry of sodium nitrate: comparison of ReO_4^- and Cs^+ primary ions 185
Photodissociation
Photodissocociation of C_4H_4 radical cations produced by fragmentation of 1,5-hexadiyne. A competition between one- and two-photon dissociation and photon-induced isomerization 81
Photon-induced isomerization
Photodissocociation of C_4H_4 radical cations produced by fragmentation of 1,5-hexadiyne. A competition between one- and two-photon dissociation and photon-induced isomerization 81
Potassium
Isotopic abundance measurements of K and Ca using a wide-dispersion multi-collector mass spectrometer and low-fractionation ionisation techniques 1
Proton transfer
Selected ion flow tube studies of the reactions of the isomers $C_2H_5OH_2^+$ and $(CH_3)_2OH^+$ with a series of molecules 221

Rate coefficient
Selected ion flow tube studies of the reactions of the isomers $C_2H_5OH_2^+$ and $(CH_3)_2OH^+$ with a series of molecules 221
Relative partial ionization cross section
Electron-impact ionization of nitric acid 131
REMPI
High intensity laser mass spectrometry – a review 149

Secondary ion mass spectrometry
Secondary ion mass spectrometry of sodium nitrate: comparison of ReO_4^- and Cs^+ primary ions 185
Application of the infinite velocity method for investigations on the spatial and time-correlated emission of the constituents forming MCs^+ secondary ions in secondary ion mass spectrometry 197
Selective photoion-photoion coincidence
Variation in branching ratios for ion pair formation from $CFCl_3$ photoexcited in the inner-shell transition regions 229
Silicon tetrafluoride
Adsorption in gas mass spectrometry. I. Effects on the measurement of individual isotopic species 207
SIMS
SIMS analysis of the near-surface layer of fibres of small diameter 69
Spatial and time correlated emission
Application of the infinite velocity method for investigations on the spatial and time-correlated emission of the constituents forming MCs^+ secondary ions in secondary ion mass spectrometry 197
Sputter yield
Secondary ion mass spectrometry of sodium nitrate: comparison of ReO_4^- and Cs^+ primary ions 185
Stereoelectronic effects
Stereoelectronic effects in phosphorous dichloride cation/pyridine complexes 89
Sulfur speciation
On-line analysis of aqueous aerosols by laser desorption ionization 29

Thermochemistry
Stereoelectronic effects in phosphorous dichloride

cation/pyridine complexes 89
Time-of-flight
Electron-impact ionization cross-section of argon ($\sigma_{n+}, n = 7, 8$) 39
Time-of-flight mass spectrometry
Electron-impact ionization of nitric acid 131
High intensity laser mass spectrometry – a review 149
Trichlorofluoromethane
Variation in branching ratios for ion pair formation from $CFCl_3$ photoexcited in the inner-shell transition regions 229
Unimolecular fragmentation
On the cleavage of the peroxide O–O bond in methyl hydroperoxide and dimethyl peroxide upon protonation 101
